

阿尔柯特（北京）清洗设备有限公司  
JmaKT (Beijing) Cleaning Equipment Ltd.

---

## A Story of Reliability

### Case 2

**Unit of use:** Panzhihua Iron and Steel Group Corporation Inspection Center

**Use time:** 2011

**Purchasing equipment:** parts cleaning machine + sewage treatment system

**Project use:** Panzhihua Steel Inspection Center is responsible for all equipment maintenance and overhaul tasks of various production plants of Panzhihua Group. Every day, the equipment is disassembled and repaired in several working areas, and the task is very large. Many parts such as bearings, bushings, machine parts, and shaft heads must be cleaned before assembly. The sewage treatment system can reuse the sewage after treatment, thereby achieving the effect of prolonging the use time of the cleaning liquid and saving the production cost.

**Project evaluation:** The parts are cleaned by the washing machine and meet the assembly requirements. The customer is very satisfied and frees the busy cleaning work. It is easy to clean and pollution-free.
